

Tom Kenyon
General Manager
Innovyz

Presentation to AMGC workshop

19/2/19

Four parts:

- 1. Thank you
- 2. How we are different to other commercialisation bodies
- 3. How we operate
- 4. The innovations in our Advanced Materials & Manufacturing program

Thank you

- Jens and the team at AMGC
- The AMGC state managers
- Especially Michael Sharpe
- All the universities that have engaged with us

How We're Different

1. Innovyz looks for manufactured products, rather than software.
2. Innovyz actively scouts for innovation.
3. Innovyz focuses on the idea, not the founder.
4. Innovyz provides interim management.
5. Innovyz continues to support its companies after 'graduation'.

How We Operate

- We work for equity not cash
- Our programs are funded by investors and we share our equity
- We look for big ideas in big markets
- We specifically look for researchers who don't want to run a business
- We licence technology
- 9 month program
- 3 themes – technology & market validation, business model & strategy, investment preparation
- Each theme has its own mentor week
- We engage Equity Managers

Current Innovations

- Coal to Carbon Fibre
- Metal Foam
- MetaMems
- Boron Nitride nano particles (tubes and onions)
- Amero
- JHT – High end applications of Titomic processes
- Nano-etching
- Targeted polymers for food
- Titanium reprocessing
- Activated carbon from Coal
