

Is your organisation equipped to supply domestic production capabilities relevant to a range of medical personal protective equipment (PPE)? This includes surgical gowns, gloves, goggles, hand sanitisers, clinical waste bags, waste bag closure devices (ties), blood and fluid spill kits, mask fit test kits and thermometers.

AMGC wishes to draw your attention to a **Request for Information** by the Department of Industry, Science, Energy and Resources. This is a request for information only. The sole purpose is to obtain information in connection with gaining an understanding of Australian manufacturing of medical Personal Protective Equipment (PPE), it is not a procurement and does not form part of any Commonwealth procurement process.

If you have capabilities relating to the above request, then AMGC encourages all members to read the tender, and highlight with others that may be in a position to fulfil the requirements of the brief.
